

Highlights

- Anytime-valid e-processes give a real-time, error-controlled AI-adoption signal.
- Diffusion takeoff declared 20 April 2025 at 42-to-1 evidence, biweekly data.
- Mid-2025 slowdown correctly held at 24-to-1 evidence, no false declaration.
- A 26-standard-error survey redesign is excluded rather than read as a shock.
- Repeated z-tests alarm 31–37 times of 48 looks and misread the redesign.
